Proposal

At the request of the City of Toronto, PortsToronto is proposing to construct a Ground Run-Up Enclosure (GRE) at Billy Bishop Toronto City Airport. A GRE is an open-air, acoustically engineered structure used to dampen the noise produced by engine maintenance run-up inspections. The City of Toronto is undertaking a technical review of the GRE, and invites you to attend a community consultation meeting on June 28, 2016 to learn more about the proposed design, construction and operation of this noise management facility.

In addition to the June 28, 2016 community meeting, interested parties may participate in a June 23, 2016 drop-in site meeting (6:30pm-7:30pm at BBTCA Terminal Building, Room LC02) to get a closer look at the proposed GRE location, and to speak with PortsToronto representatives. Please contact Angela Homewood (ahomewood@portstoronto.com) of PortsToronto for further site meeting details.

You may also view a more detailed description of the GRE facility and related technical materials at: www.toronto.ca/grereview
